

Cross-Function Features & Console Integration Strategy

Objective

Improve user engagement and data visibility by:

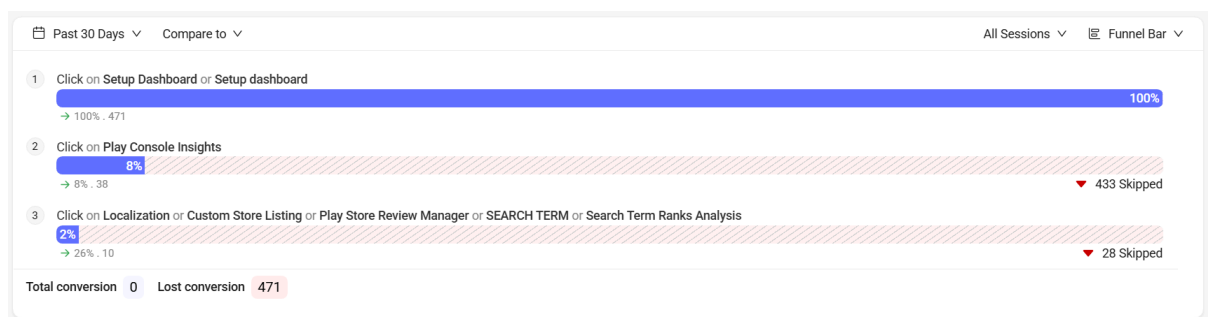

- Promoting **Play Console connection** across high-impact features.
- Enabling seamless **cross-page navigation** without relying on the sidebar.

30-Day User Analysis: Console Connections

- **Total users who added apps:** 494
- **Users who connected Play Console:** 21 (6 user connected for play store review manager)
- **Connection Rate:** 4.2%

 **Insight:** A majority of users haven't connected their console. Promoting it across relevant features can increase engagement and unlock more value.

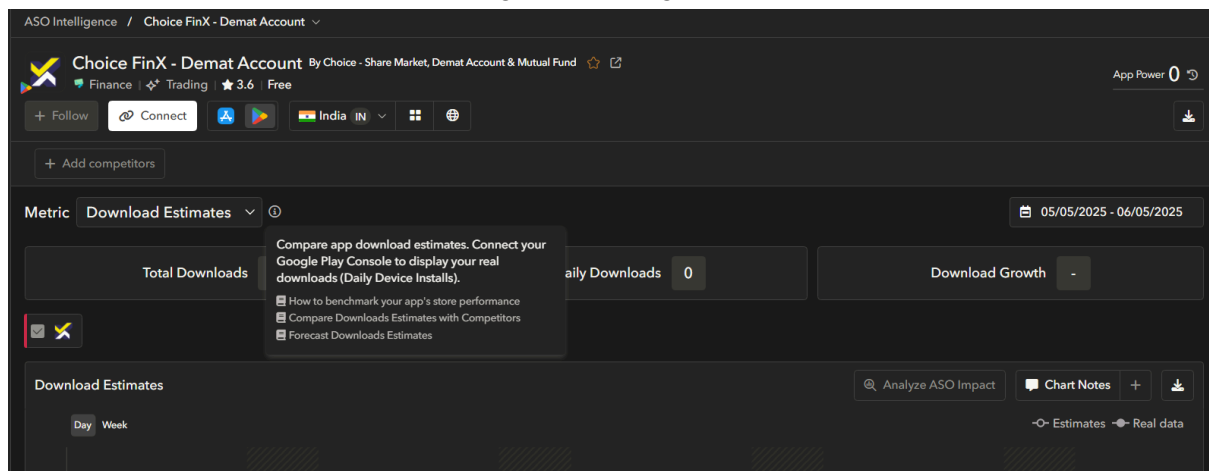

Funnel flow for user adding app >> Visiting play console >> visiting page contains STR,CSL,Localization,Review manager

Top visited pages related to console integration - for last 30 days|

1. Search term report - 274 visit
 2. Play console insight - 101
 3. Play store review manager - 88
 4. Localization - 66
 5. Search Ads insight - 47
 6. Custom store listing - 2
-

Apptweak approach on related tool pages - (having connect button and tooltips)

🚀 Promote "Connect Console" as on other Pages

Feature Page How connecting console will be useful

Review/Rating page View up-to-date reviews and ratings with reply to reviews (high impact)

Download page Unlocks actual install numbers and acquisition insights. (high impact)

Rating Booster page Flag inappropriate reviews in a minute.

Aso Historical page Track real-time updates to uncover competitor strategies and key insights.(high impact)

In the last 30 days, 24 users visited the Rating Booster feature. Out of these, only 2 apps actually had mismatch reviews.

However, by prompting users to connect their Play Console to view mismatch reviews—even if none existed—we were still able to drive user interest and successfully encourage console connections.

Seamless Cross-Feature Navigation

Avoid distracting sidebar navigation by adding related **page link** across pages:

We can have other page link which help user to navigate easily to related pages

Feature page

page link to add

When user connect Play
console by oath intergration

**Play Console Insight
Page**

→ Review manager page
→ Search Term Report

When user connect by
cookie method

**Custom Store Listing
Page**

→ Localization page
→ Search term report
→ Play console insight page

Conclusion

- Promoting "Connect Console" on related page or most visited page
Include a tooltip/banner explaining benefits of console connection

- Implement contextual navigation links between interconnected related pages.
