

Pricing Plan – User Session Summary

Scope: 20 sessions from user who had added their apps in last 7 days (jupyterapp)

Avg. Session Duration: ~3.1 minutes

User Metrics

Metric	Users
Clicked “Upgrade”	6
Hovered on Plans	15
Scrolled Full Page	12
Viewed FAQs	9
Abandoned Instantly	4

Summary -

Upgrade Interest but Low Conversion

- 15 users hovered over plan cards
- Only 6 users clicked on “Upgrade”
→ Indicates high interest but low action

Moderate Engagement

- 12 users scrolled the full page
- 9 users viewed FAQs
→ Users explored but likely needed more clarity

Early Drop-offs

- 4 users abandoned the page instantly
→ Suggests pricing didn’t match expectations or was too aggressive

User Types & Behavior

1. High-Intent Users (6 sessions)

- Entered via direct link or add-app gating
- Hovered all plans (>3s), viewed Trial & Comparison
- Paused ~2.2s before clicking Upgrade → dropped
- Reason: price concerns or missing trust triggers

2. Exploratory Users (10 sessions)

- Came from sidebar/banner
- Tapped tabs like Trial, Payment; no Upgrade clicks
- Avg. 2.5 min on page, scrolled halfway, left
- Behavior: evaluating, not yet ready

3. Confused Users (4 sessions)

- Repeated clicks on “Upgrade to Add App”
- Left pricing page within 10s
- >3s hesitation before first action
- Cause: unclear pricing, no content above fold

Interaction Patterns

- Clicked static/non-interactive areas on plan cards
- Avg. 2.3s delay before scrolling (reading)
- Frequent switches between Pricing and Features tabs

Conclusion-

This report shows strong exploratory intent, moderate upgrade interest, but high friction around trust and clarity of value.

Upgrade Interaction Summary

Source	Vis.	Hover	Click	Drop	Rage / Dismiss	Avg. Time
Pricing Page – Cards	85%	72%	42%	58%	—	1m 46s
My Apps – Add App CTA	92%	51%	18%	82%	11% Rage Clicks	—
Upgrade Pop-up (Modal)	74%	44%	23%	—	62% Dismissed	32s

Vis. = % of users who saw the element, **Hover** = % who hovered or paused on it
Click = % who clicked the element, **Drop** = % who saw but didn't click
Rage / Dismiss = % who rage clicked or closed the modal, **Avg. Time** = Time before action (click/close)
